Your industry

The healthcare industry is characterized by growing research and development efforts. This, along with the need to maintain product integrity and security, have led to rising logistics and transport costs.

Within this dynamic environment, we identify and develop customized solutions to meet your needs and provide dedicated just-in-time delivery to global destinations. Proven procedures and processes are integrated in our global quality management system and described in standard operating procedures (SOPs), in order to protect the integrity of your pharmaceutical products in transit.

We offer flexible transportation and logistics solutions with many modes of transport to choose from, depending on urgency and consignment size. These include air freight, ocean freight, road and courier services. We offer value-added services, such as order confirmation, consignment documentation, and forwarding procedures that meet the industry's hygiene, temperature, and pressure requirements throughout the entire supply chain.

Our team

Our dedicated healthcare specialists have in-depth industry knowledge and extensive expertise in supply chain consulting, implementation, and execution. All team members are committed to applying their skills and market intelligence to ensure that your shipments arrive at the right place and at the right time, every time.

Our specialists are strategically located in key areas around the world based on the industry's major strategic markets and your requirements. They ensure operational excellence across air freight, ocean freight and supply chain management, thereby covering your global and local needs.

We are ready to put our experience and passion for solutions to work for you by complementing your core competencies, thus allowing you to focus on your customers.

Our services, your benefits

Our healthcare services

Our experts will work with you to provide a tailor-made solution to meet your specific needs. Besides our core air and ocean freight products, we offer healthcare-specific services like:

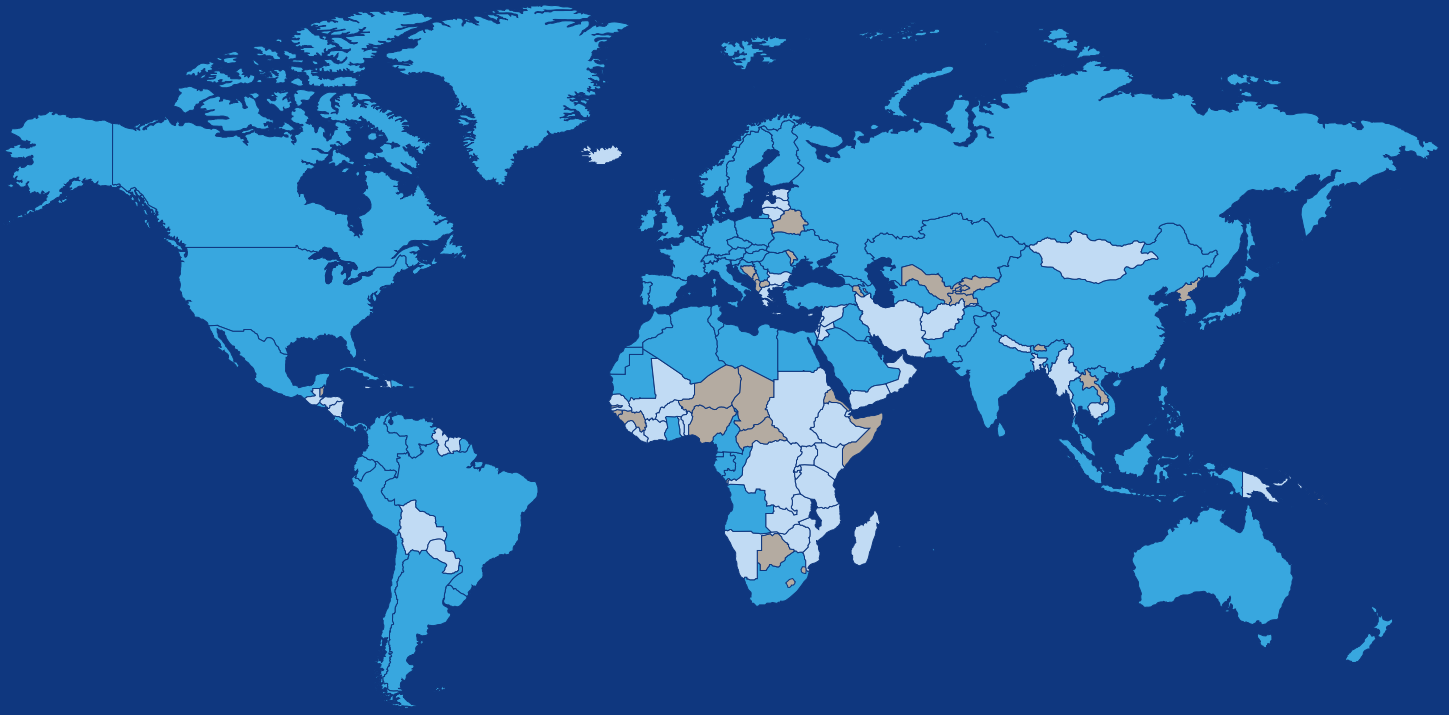

- Special safety and security measures including FDA-registered office and warehouse facilities
- Quality and HSE management system based on ISO certification including subcontractor management
- Numerous TAPA A certified warehouses
- Best-in-class IT solutions
- Special containers for air and ocean freight to maintain specific temperature ranges
- Temperature data recording during transport and analysis
- Cold chain event management
- Humidity control
- Compliance with current GDP (Good Distribution Practice)
- Direct distribution, door-to-room and hospital delivery
- Product-specific packaging solutions

Your benefits

We work closely with you to design an optimal supply chain that adds value to your company, delivers cost savings, optimizes processes and provides additional major benefits like:

- High security and safety measures throughout the entire supply chain
- Dangerous goods handling capabilities
- Speed to market (e.g. product launch or stock-out)
- Full end-to-end supply chain visibility and lot traceability
- Global Regulatory & Security Compliance
- Information confidentiality (e.g. clinical trials)
- Validation and qualification of transport solutions or trade lanes
- Robust cold chain management and operational capabilities (temperature-sensitive handling)
- Value-added services such as re-labeling and secondary re-packaging
- QEP (Qualified Envirotainer Provider) certified
