Your industry

The hi-tech industry requires fast and reliable logistics chains that link the industry's key production sites with distribution channels throughout the world. Technological innovations combined with the world's emerging markets, which are rapidly catching up with developed countries' consumer habits, continue to characterize this energetic development. The adoption of new technologies has inevitably led to shorter product life cycles. These, in turn, require more complex and sophisticated transportation and supply chain management solutions.

We can meet your needs thanks to our broad global transport reach and extensive network combined with profound industry understanding. We offer you not only transport services that ensure the timely delivery of parts and products, but complete end-to-end supply chain solutions. Whether you are in the semi-conductor industry, the computer and electronics industry, or provide electronic manufacturing services, we understand your business and requirements.

Our team

Our dedicated hi-tech specialists have in-depth industry knowledge and extensive expertise in supply chain consulting, implementation, and execution. All team members are committed to applying their skills and market intelligence to ensure that your customers are completely satisfied with your services as we deliver your products to the right place and at the right time, every time.

Our specialists are strategically located in key areas around the world based on the industry's major strategic markets and your requirements. They ensure operational excellence across air freight, ocean freight and supply chain management, thereby covering your global and local needs.

We are ready to put our experience and passion for solutions to work for you by complementing your core competencies, thus allowing you to focus on your customers.

Our services, your benefits

Our hi-tech services

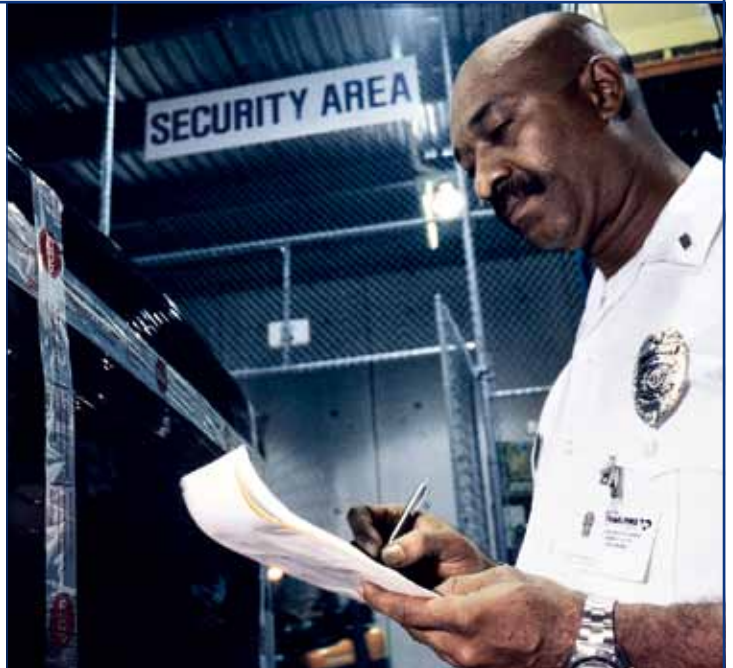

Our experts will work with you to provide a tailor-made solution to meet your specific needs. Besides our core air and ocean freight products, we offer special hi-tech services like:

- Vendor Managed Inventory
- Distribution warehousing
- Supplier Consolidations
- Direct to Market (D2M)
- Reverse Logistics
- Control Towers
- TAPA-compliant Operations

Your security

Considering the highly vulnerable nature of hi-tech products, we have developed industry-specific solutions focusing on a highly secure supply chain.

Experienced security teams have been assigned to strategic locations. These teams assess and improve transportation routes on a daily basis. This set-up guarantees low-risk exposure with regard to theft or damage to your valuable products with an unmatched time-to-market performance.

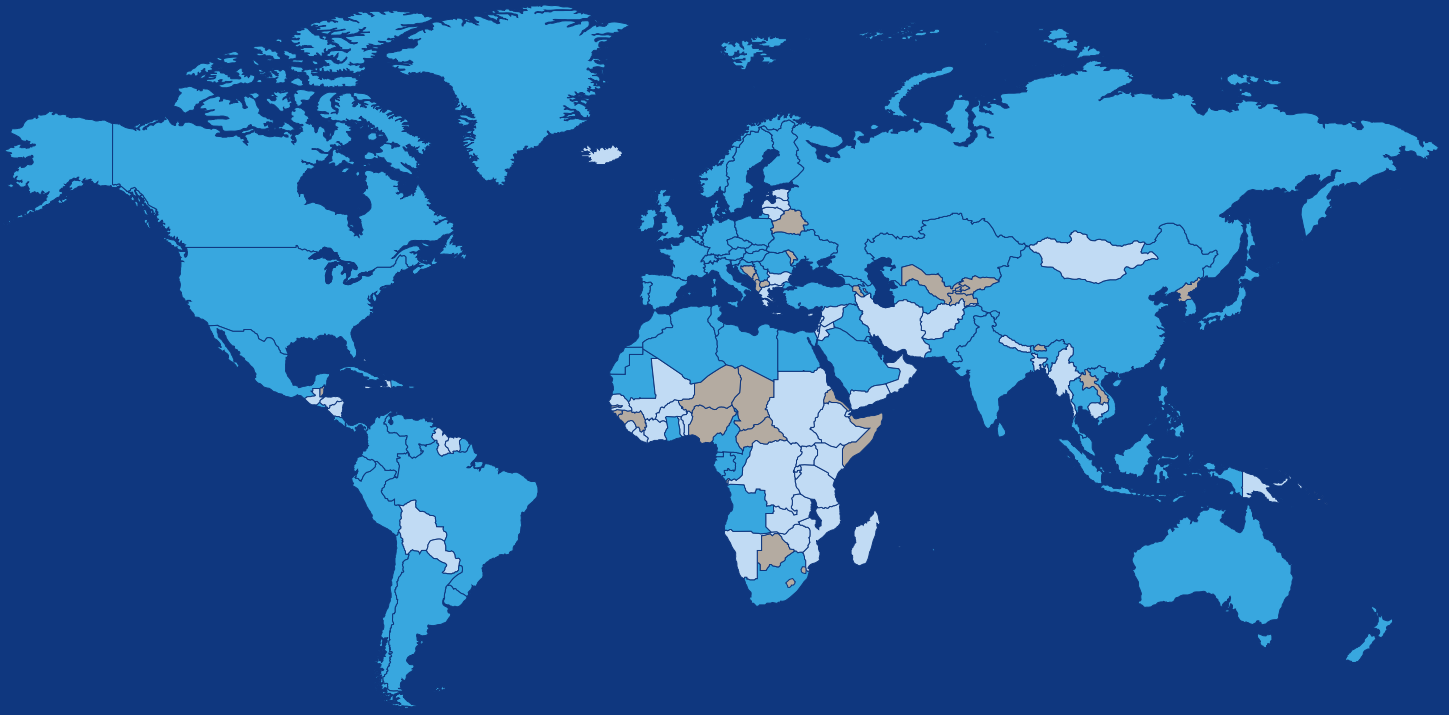

Your benefits

We work closely with you to design an optimal supply chain that adds value to your company, delivers cost savings, and decreases time-to-market. We utilize our proven logistics expertise to drive innovation and continuously improve all processes.

We customize our operating practices to meet your supply chain requirements by involving small and large supplier networks on multiple continents, designing creative end-to-end solutions, optimizing communications and information management, and improving delivery performance.

Complex logistics solutions require state-of-the-art support systems. We provide web-based software programs to support a smooth process flow, thus ensuring complete visibility and transparency within your supply chain.
